PROJECTS

Code Collab | React, Node.js, Express.js, MongoDB, Socket.IO, JWT

GitHub

- Built a real-time collaborative coding platform supporting simultaneous multi-user editing using Socket.IO
- Implemented JWT authentication and role-based authorization for secure collaboration.
- Built scalable backend APIs using **Node.js**, **Express.js**, and **MongoDB**.
- Reduced latency through efficient socket communication.

Mini Vercel | Deployment Platform | React, Node.js, Express.js, AWS S3

GitHub

- Built deployment platform supporting automated frontend deployments using React, Node.js, AWS S3.
- Designed deployment workflow and storage pipeline reducing deployment latency.
- Implemented deployment workflows and project management APIs.

Manscript - Full-Stack E-commerce Platform | MERN Stack, Razorpay API, JWT

GitHub

- Designed and implemented scalable REST APIs for product and order workflows.
- Developed authentication and role-based access control using JWT.
- Integrated payment workflows and improved reliability through structured error handling.

Ai code Reviewer | MERN Stack

GitHub

- Developed an AI-powered code review platform using Gemini API to provide automated code analysis and improvement suggestions.
- Built a full-stack application using React, Node.js, Express, and MongoDB.
